

 **GEBERIT**

# Geberit Made Easy

So you're new to Geberit, or the world of wall-hung toilets, or both. You want to get on board as quickly as possible because they have a great, clean design! It's even easier than it looks: Here's the scoop – the entire installation needs only 3 things: 1) a carrier, 2) an actuator, and 3) a toilet bowl.

That's it. That'll cover 90%+ of installations. Clients may have questions about remote actuators for ADA installations, or Touchless actuators, or waste and water connections, or venting, or code approvals, or connecting to a Washlet. For those issues, feel free to contact your favorite Western Salesperson, or you can give me a call directly.

Thanks,  
Tom Slankard

# Step 1: Choose a Carrier

Geberit Toilet In-Wall Carrier/Actuator Compatibility Chart

**111.335**  
(2"x6" construction)

**111.728**  
(2"x4" construction)

**111.012**  
(2"x6" pre-wall construction)

## Step One:

Choose the carrier first. There are only 3 different carrier models. Again, that's it. The carriers are either for 2"x6" standard wall, 2"x4" standard wall, or 2"x6" short wall (for under a big window, for instance).

## Step Two:

If you are using a 2"x6" standard or 2"x4" standard carrier, you need to choose a Sigma series actuator. If you are using a 2"x6" short wall, you need to choose an Omega series actuator.

## Step Three:

Now for the toilet bowl. What brands are compatible with the Geberit carrier? How's this for a selection: TOTO Aquia, TOTO Maris, Blue Bathworks, Lacava, Kohler, Villeroy & Boch, Duravit, Mirabelle, Icera, Laufen, Neo-Metro & DXV.

Geberit North America is part of the Geberit Group, a European market leader and global provider of sanitary technology. Located in Des Plaines, Illinois, Geberit North America provides concealed tank and carrier systems for wall-hung and floor-mounted toilets and fixtures. Geberit systems improve the look of any bathroom by hiding the unsightly toilet tank. Replacing a standard tank and toilet with the Geberit system results in more usable space, improved hygiene and better accessibility. The unique dual-flush valve saves water and is practically maintenance free. Geberit also offers cable-controlled bath waste and overflows in a variety of designer finishes. Critical working parts are outside the waterway, ensuring years of trouble-free operation.
