

# Just the TOTO Facts

## Why TOTO

Industry-leading performance

Ground-breaking innovation

Eco-friendly products

Full product suites

Products for every price-range

Largest selection of water and energy efficient products in high performance contemporary, transitional, and traditional styles

## TOTO Flushing Systems

- **G-Max** flushing technology features a 3" flapper, large syphon jet, and glazed trap passage way. **(1.6 GPF)**
- **E-Max** is similar to G-Max, but it uses 20% less water. **(1.28 GPF)**
- The **Dual Max** dual-flush Aquia collection features "wash-down" flushing technology, where the water that is flushed only comes from the rim of the toilet bowl, pushing rather than pulling waste from the bowl. **(Average of 1.28 GPF)**
- The **Double Cyclone** system has two larger jets on the sides of the bowl that causes the water to swirl around to create a cyclone-like action and cover the entire surface of the bowl for a more thorough bowl wash. **(1.28 GPF)**

## Eco Power

- TOTO's EcoPower captures the energy of the water through a turbine that charges the next use, which saves energy.
- If a faucet or flush valve is used at least 10 times a day, the lithium back-up battery is almost never used. Under these conditions, these batteries can last up to 19 years.
- Sensor: Called the "Smart Sensor," this faucet and flush valve technology is designed to adapt to the user's habits by constantly scanning usage.
- Sensors can help prevent the spread of bacteria by eliminating the need to come in contact with one of the most frequently touched surfaces in the bathroom.

## Warranty

- The warranty is 1 year for china and parts, 3 years for commercial products, and limited lifetime for residential faucets.

## Neorest

- The Neorest integrated toilet/bidet features a clean integrated aesthetic, innovation, performance, luxury, and eco-friendliness.
- The latest model, the Neorest 550, features includes full bidet function, heated seat, automated seat, remote control, dual-flush water savings, and even a sound system. **(1.28 GPF)**
- Depending on the needs of the client, the Neorest Collection includes additional integrated toilet/bidet models, lavatory sinks, airbaths, and shower systems.

## Washlet bidet seats

- A Washlet retrofits on a toilet and functions like a bidet.
- Depending on the model, features can include the warm water cleaning, retractable wand, warmed seat, LCD remote, and deodorizer.
- The Washlet has health-related benefits, since water is more comfortable and effective cleaning agent than toilet paper.
- Because it reduces or eliminates toilet paper use, the Washlet is environmentally friendly.

# TOTO®

## TOTOlogy

- TOTO has put a green philosophy to practice within the company from paperless office policies to recycling production water.
- TOTO factories also work with government agencies to become leaders in safe and environmentally sound practices.
- TOTO strives to manufacture products that are not only resource conservative, but that also exceed customers' standards for performance.
