If it's not an Oliveri, it's a Compromise.

Oliveri™ Sinks Offer More Than Beauty and Unique Design to the Kitchen.

At the heart of your home is your kitchen. Oliveri sinks transform the kitchen into an efficient gathering place that provides practical work centers, convenience, and beauty. Oliveri sinks are made with heavy gauge type 304 18/10 stainless with the highest percentage of chromium and nickel to produce a deep lustrous finish that is corrosion resistant.

Reasons Why the Oliveri Quality Shines Through

- The Oliveri™ signature represents over 58 years of world class manufacturing in Australia. If it's not an Oliveri, it's a compromise.
- Oliveri sinks have a Lifetime Limited Buyer Warranty. Combining top-grade materials with state of the art production technique, solid construction, and experienced craftsmanship, Oliveri sinks are built to last a lifetime.
- All Oliveri self-rim topmount sinks are designed with a unique rail clipping system. This clipping system allows effortless correct fitting on every spot by simply moving the clip where needed.
- Oliveri sinks are recognized for their extra deep basins and recessed drop ledge, which adds to the sinks' distinctive design.
- All Oliveri self-rim topmount sinks have the unique Oliveri integrated sealing strip. This means when the sink is fitted on a laminate or flat solid surface counter it is water sealed and does not require further sealant.
- Oliveri drain board sinks feature an elegant and unique fan fluted drainer, rounded corners and a double rim design for a more efficient draining and splash protection.
- All Oliveri sinks are sprayed underneath with our patented "Softtone™" for soundproofing and to prevent heat loss.
- All Oliveri sinks are produced in high quality 304 18/10 stainless steel that ensures exceptional appearance for years to come. For extra strength, all bowls are continuous welded into the frame.
- Oliveri sink and food preparation centers offer several different and useful accessory packages. The cutting boards, together with the colanders, fit conveniently into the sink basins. Other accessories include dish-rinsing baskets, drain trays, and basket strainer drains. Appropriate accessories are included with each sink at NO EXTRA CHARGE.
- Most Oliveri sink offerings are available for self-rim top mount or "Down-Undermount™" installation, ideal for counter tops in marble, granite or other solid surface products.

www.oliverisinks.com

The company began life as a general and domestic metal fabricator in 1947. The founders pioneered the deep drawing technology in Australia, creating seamless, deep drawn stainless steel basins. A multi-million dollar upgrade in 1994 saw the production facility move to new 66,000 square feet premises and the installation of the latest high-tech machinery sourced from around the world.

The introduction of new equipment has allowed Tasman Sinkware to produce their sinks to 'world standard' best practice. Tasman Sinkware is a Quality Endorsed company and all products are manufactured to Standard ISO 9002, and sinks have "UPC" (Uniform Plumbing Code) approvals. They reflect modern and innovative styles that are crafted to suit even the most discerning homeowner.

Tasman Sinkware is proud of its hard-earned reputation as a premium quality and market-leading designer and manufacturer of kitchen products. Tasman Sinkware will continue to develop designs and styles suitable for any application where the highest standards are demanded.
