

10-MINUTE "EXPERT" **Geberit Edition**

A brief training brochure for busy plumbing industry professionals (Revised 08/18)

A wide, horizontal photograph of a modern bathroom. It features white subway tiles on the wall, a wooden vanity with a white countertop, and a shower area on the left. The word "Overview" is overlaid in large white letters.

Overview

Brief History

A Swiss-based plumbing manufacturer since 1874, Geberit is one of the world's top three companies in the plumbing industry by sales dollar volume. Geberit North America sells just a subset of Geberit's world-wide product line up, concentrating on in-wall tank/carrier systems and bath waste & overflows.

Geberit North America is based in metro Chicago, and handles logistics, marketing, and sales support for the US Market.

- Easy to maintain
- Can accommodate a wide range of installation types

Available Models

Installation options: Floor-mount, rear outlet, floor-mount, floor outlet; wall-mount, rear outlet

Available in black, white, umber, or sand glass finishes

Custom designer/homeowner graphic overlay

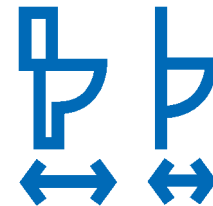

Features

Space-Saving Feature

Putting the tank in the wall saves 2-3 square feet of valuable floor space in every bathroom.

- Tank is in the wall, instead of in the room
- All service is done through the actuator (flush plate)

Easy-Cleaning Feature

Putting the tank in the wall keeps the bowl off of the floor, allowing for easy cleaning of and around the toilet.

- No need to be on hands-and-knees to wipe the floor around the toilet. With the bowl off of the floor, you can use a mop or broom.

Load-Bearing Feature

No need to take unnecessary risks with your plumbing; Geberit's in-wall carrier system support as much weight as you need.

- Supports up to 880 pounds

Features (cont.)

Easy-Maintenance Feature

All parts are accessible through the actuator flush plate.

- Easy access
- 10-year warranty on internal parts

Minimalist Design Feature

Wall-hung toilets are a design-forward alternative to traditional tank-type toilets.

- Putting the tank in the wall and replacing it with a modern flush plate is the essence of minimalist and European design.
- Geberit offers dozens of modern designs and finish options for actuator plates.
