

# Steam Temperature Performance: Steamist TSG

**Brand X steam system**  
Without Dual Sensor Technology, the temperature overshoots 17°F before lowering towards the desired set point.

110°F = Setpoint

**Steamist TSG Steam System with the TSC-450 Digital Control**  
With the Steamist SteadySteam, Dual Sensor Technology and two stage filling chamber the user enjoys consistent steam, without the up & down spiking and no large temperature overshoot

**Brand Y steam system**  
Without the proportional heating feature and the 2 stage filling chamber, the unit is forced to turn on and off,
