

MTI: A World of Customization Options

We live in an era of personalization. You can have your fast-food burger prepared "your way". You can customize the appearance of your computer screen. You can have information delivered where, when and how you want it, either to your desktop computer or to your hand-held wireless device. And the list goes on and on.

While any of these preferences may be desirable, none of them will actually contribute to your **health and well-being**. So when it comes to your wellness and selecting products and a manufacturer that will meet your specific needs and actually have an impact on your health, should you not be even more selective and have higher expectations? There is nowhere in the household where this is more important than the intimacy and privacy of the bathroom.

At MTI, Customization Is Standard

MTI is different from every other bath manufacturer in the marketplace. MTI's focus is on providing you with the **hydrotherapy** you need, packaged in the design you prefer and built in a way that accommodates the installation requirements of your setting. MTI alone enables you to have maximum control in creating your personalized bathing experience for your bathroom. No other manufacturer can. This intense degree of customization applies to:

- The selection of hydrotherapy type: soaker; air bath; whirlpool; combination
- The specification and placement of jets, controls and other tub-mounted components.
- A huge variety of options.
- The positioning of all system components, such as pumps.
- Specific installation requirements, such as location of tile flanges
- Other installation facilitators such as a pre-leveled foam base or pre-leveled frame system.

No other manufacturer offers this degree of extreme customization AND can ship most products within 7 business days. No one.

So how can MTI offer this unprecedented degree of personalization? First, because we want to. Our goal is to provide our customers with the product and bathing experience they want and deserve. Secondly, because we can. At MTI each tub is made to individual specifications and manufactured only after it has been ordered. So we can make it any way you'd like. And yet even with this manufacturing flexibility, your product will quite remarkably be shipped within 7 business days, the fastest in the industry.

MTI's extreme customization capabilities enable individuals to achieve the appearance, and benefit from the therapy, that they are seeking. And if you happen to be a residential or **commercial** designer or architect, you will appreciate just how far MTI will go to facilitate your vision of creating truly unique bathroom spaces. So whether you are a private individual or a trade professional, "Design Your Experience" with MTI.
